PROFILE

I'm Dan Luis, a Computer Technologist with a strong academic background and experience in web development.

Throughout my career, I have had the opportunity to work on various projects and challenges that have strengthened my skills in web development and teamwork, as well as my ability to adapt to dynamic environments and collaborate efficiently in multidisciplinary teams.

My passion for computer science has led me to constantly look for opportunities for learning and growth.

EXPERIENCE

Portfolio with React

Development of an interactive personal website using React, with sections for experience, projects and skills, designed to be responsive.

CRUD NodeJs

Creation of a RESTful API in Node.js and Express.js to perform basic CRUD operations on a database, allowing data management through HTTP requests.

CRUD C#

Development of a desktop or web application using C# and .NET, with CRUD functionalities implemented to manage data efficiently.
